

# Bucket Calf Feeding Management

**Leavenworth Co. Coop**  
**1205 N. Main**  
**Lansing KS, 66043**

**Tel: 913-727-1900**

## **First 3 days:**

Feed colostrums supplement.

## **4th day to 5 weeks:**

Feed Amplfy Max Milk replacer.

Continue to feed milk replacer until calves are consuming a minimum 1.5 lb of dry feed per day for 3 days.

During the last week of milk replacer feeding, transition to once/day milk feeding to encourage dry feed intake and make weaning easier.

Make fresh water available for day 4 on.

## **5th day to 6 weeks:**

Begin feeding Herd Maker 16% B70 Pellets.

Introduce hay feeding after calves are consuming 5.0 lb of starter per head per day.

## **5 weeks + :**

Feed a complete feed along with providing Hay or pasture.

Provide plenty of water.

## **Management Tips:**

Keep environment clean, dry and draft free.

Provide adequate space that is well bedded.

Provide good hay and lean water. Make certain that calves find feed and water.
