PRODUCT	CRUDE PROTEIN %	CRUDE FAT %	LYS %	FEED FORM	MED	PURPOSE
PIG						
SHOWPIG GROWER T100	19.5	5	1.2	P	Tylan 100	For pigs weighing about 40 - 150 lbs; Tylan -med for Illeitis and growth promotion
SHOWPIG 16 T100	16	6.5	.8	P	Tylan 100	High energy feed for softening muscle and extra growth 125 lbs to show

1. Use High Octane Champion Drive Topdress as needed to enhance muscle (1/2 to 1 lbs/day)
2. Use High Octane Power Fuel as needed to enhance cover and muscle, and improve overall health (1/2 to 1 lbs/day).
3. Growth performance can vary depending upon genetics, environment, management, facilities, and immune status. The above figures are estimates only and do not reflect a guarantee of performance.
4. Consider lowering protein and increasing energy when muscle becomes too extreme, body condition is too lean, or the pig has structural issues.
5. Add HONOR Showpig Paylean Premix at the 4.5 to 9 grams/ton level during the final 45 – 90 lbs of weight gain for faster growth and added muscle development.
6. Deworm pigs thoroughly and effectively about every 30 to 45 days through the growing season.
